Multisensor 4 in 1 (movement, temperature, humidity and brightness)

The 4-in-1 MultiSensor is the perfect solution for your home. With a modern and elegant design, the new sensor contains all the technology of the MyVirtuoso Home product line and is capable of monitoring four different information: **movement, temperature, humidity and brightness**.

If included in the MyVirtuoso Home home automation system, the sensor can communicate directly with the dedicated MyVirtuoso Home ES application, sending alarm notifications or real-time reports of some of the monitored functions.
Thanks to MyVirtuoso Home it will be possible to create automatisms that will be implemented when the sensor detects any anomaly in the environment in which it is positioned.

The 4 in 1 is equipped with a fixing bracket that allows its installation on any type of surface using the plugs supplied or the double-sided adhesive present in the package. The life of the batteries depends on the context of use and the configuration of the reporting frequency but can also last up to 2 years.

It can be powered either by battery or via MicroUSB Type B cable.

Multisensor 4 in 1 (movement, temperature, humidity and brightness)

Technical Note P/N 01335-1902-00 - rev. 1 28/12/2020

Features

Protocol: Z-Wave.
Power supply: 2 CR123A batteries.
Image distance: 12m
Image angle: 120 °.
Temperature detection: 0-40 ° C.
Humidity detection: 0-85%.
Brightness detection: 0-3,000 Lux.
Tamper: Yes.
Wireless range: about 30m.
Protection: IP21.
Fixing: with dowels or double-sided adhesive.
Dimensions: 45 x 45 x 48 mm.
Wireless certification: Z-Wave Plus.
